\* If you are applying for multiple facilities, you must call 1-888-339-PTRK(7875)

***Why do we need this information?***

EPA needs background information on your facility to evaluate your application.

***What do you need to do?***

- ♦ Provide background information on your facility.
- ♦ Identify your environmental requirements.

# Section A

*Tell us about your facility.*

**1** What do you do or make at your facility?

We manufacture lightweight coated paper for use in magazines, catalogs, and other publications.

**2** List the North American Industrial Classification System (NAICS) codes that you use to classify business at your facility.

NAICS  
2621    2611    \_\_\_\_\_

**3** Does your company meet the Small Business Administration definition of a small business for your sector?

☐ Yes                      ☒ No

**4** How many employees (full-time equivalents) currently work at your facility? If you checked "Yes" in question 3 and have fewer than 50 employees at your facility, then you are considered a "small facility" by the Performance Track Program.

- ☐ Fewer than 50
- ☐ 50-99
- ☐ 100-499
- ☐ 500-1,000
- ☒ More than 1,000

**5** Complete the Environmental Requirements Checklist on pages 32-38 of the instructions and enclose it with your application.

## Section A, continued

Expiration Date:

- 6 Optional: Is there anything else you would like to tell us about your facility? Do you participate in other voluntary programs at the local, tribal, State, or Federal level?

The Bucksport Mill's employees share their customers' and community's concern for the environment. The mill pioneered the manufacture of ultra-lightweight coated publication paper, thereby reducing the amount of solid waste generated by the publications' readers. Through capital investment, innovative management, and material substitution, the mill has dramatically reduced air and water emissions (75% improvement in criteria air pollutants, for example), use of toxic materials, and generation of solid and hazardous waste. For their voluntary efforts, the Bucksport mill's employees received environmental awards from Maine's Governor and the Maine Department of Environmental Protection in 2001 and 2002.

**Why do we need this information?**

Facilities need to have an operating Environmental Management System (EMS) that meets certain requirements.

**What do you need to do?**

- ♦ Confirm that your EMS meets the Performance Track requirements.
- ♦ Tell us if you have completed a self-assessment or have had a third-party assessment of your EMS.

# Section B

*Tell us about your EMS.*

Read the EMS requirements on page 9-12 of instructions.  
Tell us if your EMS meets these requirements for:

**Why do we need this information?**

Facilities need to show that they are committed to improving their environmental performance. This means that you can describe past achievements and will make future commitments.

**What do you need to do?**

Refer to the Environmental Performance Table in the instructions to answer questions 1 and 2.

# Section C

*Tell us about your past achievements and future commitments.*

**Part 1** You must report past achievements for at least two environmental aspects, and you must choose these aspects from the Environmental Performance Table on pages 29-31 of the instructions.

Please quantify each of your aspects using the units listed for that aspect in the Environmental PTrack Information Hotline at 1-888-339-PTRK.

**Note to small facilities:** If you are a small facility, you must report past achievements for only one environmental aspect.

**First achievement**

<b>1</b> What aspect have you selected from the Table on page 29-31?	SO2	
<b>2</b> What units are you using to quantify this aspect? (See Table, page 29-31.)	tons	
	PAST	CURRENT
<b>3</b> List the past annual quantity of the aspect (from two years ago) and the current annual quantity of the aspect (from the most recent year for which you have data).	3316	975

5 Estimate your past normalizing factor (Page 18 of the Instructions will help you calculate this.)	0.6	1.0
6 What is your normalizing factor based on (e.g., production, employment)?	Heat Input to boilers (MMBTU)	
7 You reported an improvement in the quantity of the aspect in Question 3. How did you achieve this improvement?	In addition to eliminating coal burning and significantly reducing oil use, the new gas turbine allowed the mill to retire or curtail operation of older, less efficient, much higher-emitting units.	

**Third achievement**

1 What aspect have you selected from the Table on page 29-31?	Emissions of Toxics (SARA 313 Air Emissions)	
2 What units are you using to quantify this aspect? (See Table, page 29-31.)	lbs	
	PAST	CURRENT
3 List the past annual quantity of the aspect (from two years ago) and the current annual quantity of the aspect (from the most recent year for which you have data).	335,428	111,953

5 Estimate your past normalizing factor (Page 18 of the Instructions will help you calculate this.)	0.6	1.0

06/30/03

<b>6</b> What is your normalizing factor based on (e.g., production, employment)?	Heat Input to boilers (MMBTU)
<b>7</b> You reported an improvement in the quantity of the aspect in Question 3. How did you achieve this improvement?	Installation of a gas turbine replaced all coal and approximately 50% of #6 fuel oil used to generate steam and electricity. As a result of burning a cleaner, more efficient fuel, toxics emissions were reduced by 67%.

**Fourth achievement**

<b>1</b> What aspect have you selected from the Table on page 29-31?	Waste to Land from Disposal	
<b>2</b> What units are you using to quantify this aspect? (See Table, page 29-31.)	tons	
	PAST	CURRENT
<b>3</b> List the past annual quantity of the aspect (from two years ago) and the current annual quantity of the aspect (from the most recent year for which you have data).	58,055	40,889
<b>4</b> What are the years for which you are reporting these quantities?	1999	2001
<b>5</b> Estimate your past normalizing factor (Page 18 of the Instructions will help you calculate this.)	0.6	1.0
<b>6</b> What is your normalizing factor based on (e.g., production, employment)?	Heat Input to boilers (MMBTU)	
<b>7</b> You reported an improvement in the quantity of the aspect in Question 3. How did you achieve this improvement?	Eliminating the combustion of coal greatly reduced the volume of ash generated. Furthermore, the remainder of the fly ash generated is beneficially used as an aggregate in concrete mix.	

**Part 2** You must make future commitments for at least four environmental aspects, and you must choose these aspects from the Environmental Performance Table on pages 29-31 of the Instructions. The aspects you select for your future commitments should be related to the objectives and targets in your EMS. Where possible, they also should be identified as having a significant environmental impact in your EMS. No more than two of your aspects can be from the

same environmental category. If you're not sure how your objectives and targets fit into our aspects or whether your aspects are significant, call the PTrack Information Hotline at 1-888-339-PTRK.

Once you have chosen your four environmental aspects, then fill in all the necessary information for these aspects in the tables on pages 7-10 of this form. Please quantify each of your aspects using the units listed for that aspect in the Environmental Performance Table. Each table that you must fill in corresponds to one of the environmental aspects you have chosen.

We will assume that your performance commitments are based on a constant production or employment level. If you would like to base your commitment on changing production or employment, please fill out optional questions 6a and 6b.

**Note to small facilities:** If you are a small facility, you must report future commitments for only two environmental aspects.

**Section C, continued**

Expiration Date:

**First commitment**

<b>1</b>	What aspect have you selected from the Table on pages 29-31?	Emissions of Sulfur Dioxide	
<b>2</b>	What units are you using to quantify this aspect?	tons	
<b>3a</b>	Is this aspect considered significant in your EMS?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	
<b>3b</b>	If no, please explain why you believe this aspect should be included as a performance commitment.		
		CURRENT	FUTURE
<b>4</b>	List the current annual quantity of the aspect and the annual quantity you are committing to achieve by the end of the third year of your participation in Performance Track.	975	650
<b>5</b>	What are the years for which you are reporting these quantities?	2001	2005
<b>6a</b>	(Optional) What is your future normalizing factor. (Page 21 of the Instructions will help you calculate this.)		
<b>6b</b>	(Optional) What is your normalizing factor based on (e.g., production, employment)?		
<b>7</b>	You committed to an improvement in the quantity of this aspect in Question 4. How do you plan to achieve this improvement?	The mill will increase its energy efficiency through various projects and process improvements and reduce burning of #6 fuel oil, replacing it with sludge and other fuels.	
<b>8a</b>	Are you subject to Federal, State, tribal, or local regulatory requirements for this aspect?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	
<b>8b</b>	If yes, please list those requirements, including the quantitative limits and compliance deadlines that apply to you. Explain how your commitment exceeds requirements.	Amendment #8 to the State's air emissions license states that combined SO <sub>2</sub> emissions from Boilers #5, #6, #7, #8 and the gas turbine shall not exceed 3265 tons on a 12-month rolling total basis. Existing emissions from these units already are 70% below that limit.

<b>6b</b>	(Optional) What is your normalizing factor based on (e.g., production, employment)?		
<b>7</b>	You committed to an improvement in the quantity of this aspect in Question 4. How do you plan to achieve this improvement?	In addition to increasing energy efficiency and reducing #6 fuel oil use, the mill will optimize operation of its emission units, particularly the #8 boiler, to further reduce NOx emissions.	
<b>8a</b>	Are you subject to Federal, State, tribal, or local regulatory requirements for this aspect?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	
<b>8b</b>	If yes, please list those requirements, including the quantitative limits and compliance deadlines that apply to you. Explain how your commitment exceeds requirements.	Amendment #8 to the State's air emissions license states that combined NOx emissions from Boilers #5, #6, #7, #8 and the gas turbine shall not exceed 1564 tons on a 12-month rolling total basis. Existing emissions from these units already are 60% below that limit. The commitment to reduce mill-wide NOx emissions by 155 tpy exceeds the current permit's requirement to lower the gas turbine's future NOx emissions to 3.5 ppm.	

**Third commitment**

<b>1</b>	What aspect have you selected from the Table on pages 29-31?	Total Fresh Water Use	
<b>2</b>	What units are you using to quantify this aspect?	gallons	
<b>3a</b>	Is this aspect considered significant in your EMS?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	
<b>3b</b>	If no, please explain why you believe this aspect should be included as a performance commitment.		
		CURRENT	FUTURE
<b>4</b>	List the current annual quantity of the aspect and the annual quantity you are committing to achieve by the end of the third year of your participation in Performance Track.	4,418,000,000	4,000,000,000
<b>5</b>	What are the years for which you are reporting these quantities?	2001	2005
<b>6a</b>	(Optional) What is your future normalizing factor. (Page 21 of the Instructions will help you calculate this.)	1.0	
<b>6b</b>	(Optional) What is your normalizing factor based on (e.g., production, employment)?		
<b>7</b>	You committed to an improvement in the quantity of this aspect in Question 4. How do you plan to achieve this improvement?	Various projects to increase the reuse of water throughout the mill and to increase the overall efficiency of the paper machines.	
<b>8a</b>	Are you subject to Federal, State, tribal, or local regulatory requirements for this aspect?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	
<b>8b</b>	If yes, please list those requirements, including the quantitative limits and compliance deadlines that apply to you. Explain how your commitment exceeds requirements.	The mill's discharge is limited by its NPDES permit to a monthly average of 18 million gallons per day. Currently, the discharge averages 12 MGD, two thirds of the limit.

<b>6a</b>	(Optional) What is your future normalizing factor. (Page 21 of the Instructions will help you calculate this.)		
<b>6b</b>	(Optional) What is your normalizing factor based on (e.g., production, employment)?		
<b>7</b>	You committed to an improvement in the quantity of this aspect in Question 4. How do you plan to achieve this improvement?	Installation of a screw press will remove more water from the sludge and allow the mill to burn more sludge in the #8 boiler.	
<b>8a</b>	Are you subject to Federal, State, tribal, or local regulatory requirements for this aspect?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
<b>8b</b>	If yes, please list those requirements, including the quantitative limits and compliance deadlines that apply to you. Explain how your commitment exceeds requirements.		

***Why do we need this information?***

Facilities need to demonstrate their commitment to public outreach and performance reporting. You should have appropriate mechanisms in place to identify community concerns, to communicate with the public, and to provide information on your environmental performance.

***What do you need to do?***

- ♦ Describe your approach to public outreach.
- ♦ List three references who are familiar with your facility.

# Section D

*Tell us about your public outreach and reporting.*

**1** How do you identify and respond to community concerns?

Community concerns are addressed through the on-site communications manager in conjunction with the affected area managers of the mill. Citizen concerns and issues are addressed in numerous ways depending on the circumstances. These may include phone responses, e-mail, letters, or face-to-face meetings, including home visitations. It is the commitment of the Bucksport facility to respond to all inquiries as expediently as possible.

Several times a year community members and leaders attend a lunch hosted by the mill. An open Q&A session follows discussion of the issues.

**2** How do you inform community members of important matters that affect them?

Whenever there may be a significant or otherwise important event or project at the Bucksport facility, various communication vehicles are utilized to communicate with and inform the public. These range from a public notice in local newspapers to community lunches where dozens and sometimes hundreds of community leaders and other members are invited to attend sessions where information concerning mill activities is shared with the community and input and feedback is sought from the community. Informational letters are included in invitations to the community lunches. Followup letters are sent to those who could not attend. The facility also has given numerous presentations at Town Council and Planning Board meetings.

## Application and Participation Statement.

I have read and agree to the terms and conditions for Application and Participation in the National Environmental Performance Track, as specified in the *National Environmental Performance Track Program Guide* and in the *Application Instructions*;

- I have personally examined and am familiar with the information contained in this Application, including the Environmental Requirements Checklist. The information contained in this Application is, to the best of my knowledge and based on reasonable inquiry, true, accurate, and complete, and I have no reason to believe the facility would not meet all program requirements;
- My facility has an environmental management system (EMS), as defined in the Performance Track EMS requirements, including systems to maintain compliance with all applicable Federal, State, tribal, and local environmental requirements in place at the facility, and the EMS will be maintained for the duration of the facility's participation in the program;
- My facility has conducted an objective assessment of its compliance with all Federal, State, tribal, and local environmental requirements, and the facility has corrected all identified instances of potential or actual noncompliance;
- Based on the foregoing compliance assessment and subsequent corrective actions (if any were necessary), my facility is, to the best of my knowledge and based on reasonable inquiry, currently in compliance with applicable Federal, State, tribal, and local environmental requirements.

I agree that EPA's decision whether to accept participants into or remove them from the National Environmental Performance Track is wholly discretionary, and I waive any right that may exist under any law to challenge EPA's acceptance or removal decision.

I am the senior facility manager and fully authorized to execute this statement on behalf of the corporation or other legal entity whose facility is applying to this program.
